

Geography – Choose 2 South American countries and research important facts about each of them to be able to compare them.

First of all you need to choose any 2 South American countries. Make sure they aren't too close to each other as this might mean its hard to find many differences.

Here is a list of some of the things you should be looking for:

- Population
- jobs
- climate
- size
- physical and human features
- language
- clothing
- culture

You can present this any way you want but here are some different ways:

- PowerPoint presentation
- Poster
- Fact file
- Video or recording of yourself

Once you are done send whatever you have made to year3-teachers@heymann.notts.sch.uk
