

Here are the next few pictures of our caterpillars. Look at how much they are growing each day.

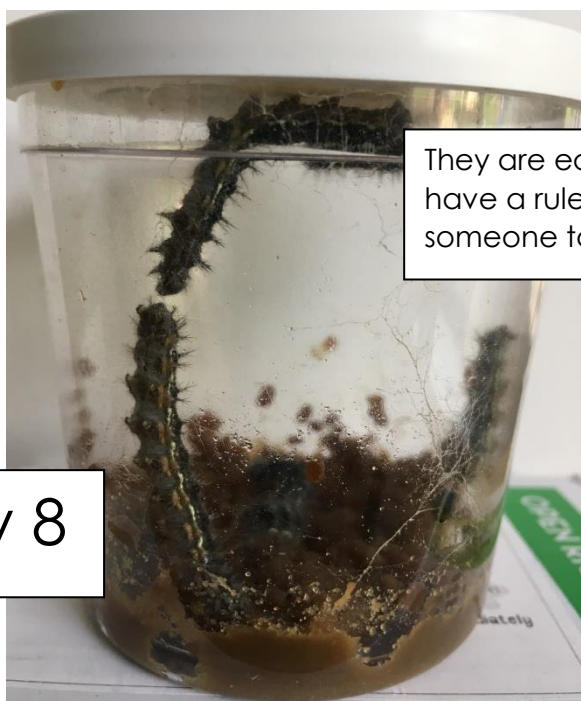

Day 6

Day 7

This is some silk webbing that the caterpillars have made.

Day 8

They are each about 3.5cm long. If you have a ruler at home you could ask someone to show you what that looks like.

Day 9

Can you see that 3 of them are getting ready at the top of the pot to become chrysalides – make their cocoons?
