### Friday – Division

' $6 \div 2$ ' means 6 **shared between** 2, or 6 put into 2 groups.  
It can be shared like this:

**Or** grouped like this:

Either way, the answer is **3** !

You could also have worked it out by getting 6 pencils, counters or anything else from your house, and sharing them into 2 groups.

Can you have a go at solving these calculations in one of those ways?

$$8 \div 2 =$$

$$10 \div 2 =$$

$$12 \div 2 =$$

$$14 \div 2 =$$

$$16 \div 2 =$$

$$18 \div 2 =$$

$$20 \div 2 =$$

Are you starting to spot a pattern? What is it?

**Challenge: Look carefully at the numbers!**

$$10 \div 5 =$$

$$9 \div 3 =$$
