

English 2 - Mummy Owl Example

Early one night, in the deep dark woods, mummy owl opened her eyes and stretched her wings. She could see her babies were still asleep, but knew when they woke up they would be hungry and need some food.

Quietly, she flew out of the nest, gliding through the trees into the darkness. She listened carefully, she could hear a scratching noise, so she landed on a high branch nearby. As she stared into the undergrowth, she saw a tiny, brown mouse going about his business. She knew this would be a perfect meal for her babies. Silently but swiftly, she swooped down and caught the mouse in her sharp claws. Feeling pleased with herself, she turned to fly back to the nest.
