

Perimeter

To find the perimeter we need to add all the measurements from around the outside.

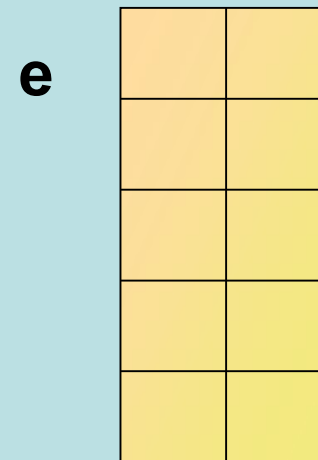

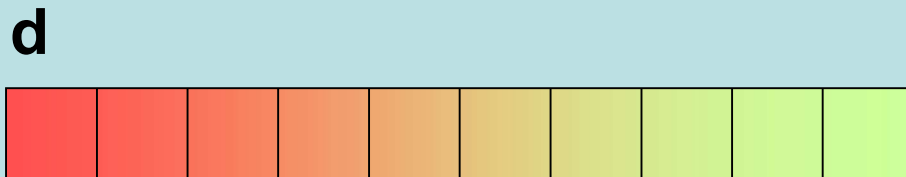

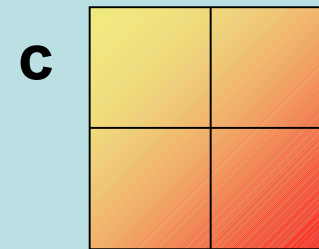

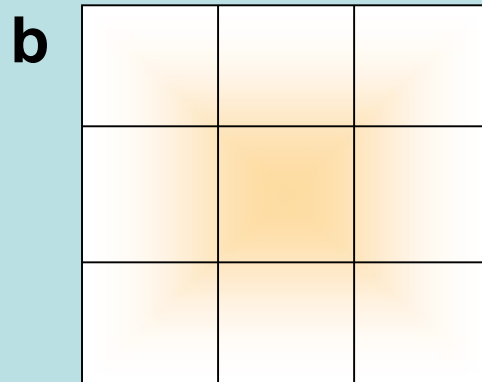

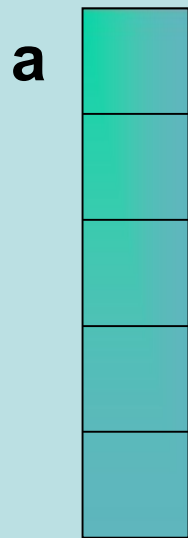

$$8\text{cm} + 8\text{cm} + 8\text{cm} + 8\text{cm} = 32\text{cm}$$

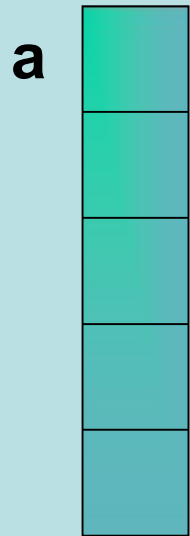

Do we have to measure every side to work out the perimeter?

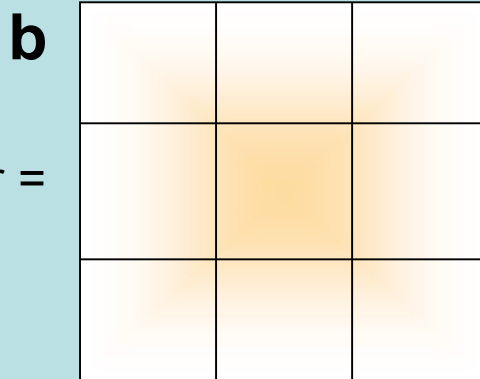

Write down the perimeter for each shape. Which shapes have the same perimeter?

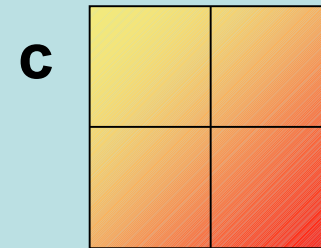

Write down the perimeter for each shape. Which shapes have the same perimeter?
