

Half Term Local Project

During half term we would love for you to find out a little bit more about your **local area**. Here are some ideas of things you could include in your project.

1. You might want to find out about all of the **local amenities** in your area, for example:

shops, libraries, doctors' surgeries, dentists, parks, bus services, restaurants

(Maybe you could do a tally chart of all the different amenities that you can find whilst out on your daily walk and then present your findings into a bar chart!)

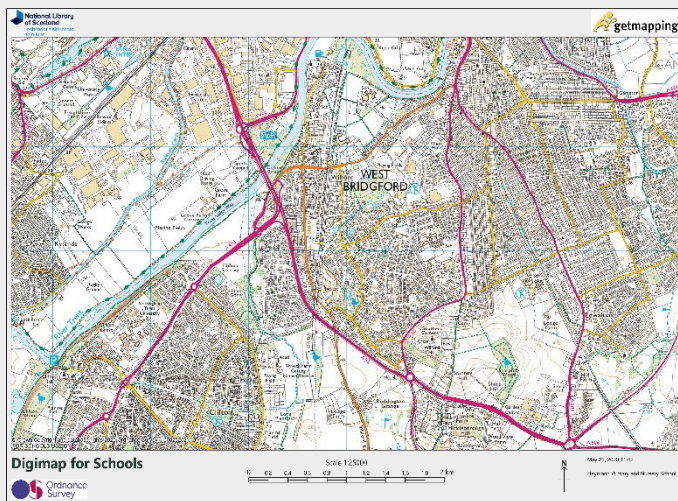

2. You could **draw a map** of your local area.

Or you could use **digimap** to map out your local area.

(If you click measurement tools down the left-hand side bar, it allows you to measure a distance or area of your choice).

Username: NG27GX

Password: troafs1967

3. You could find out about the **wildlife** in your local area.

4. You could research how your local area has **changed over time**, for example, is there a new building that wasn't there before? Have the shops or restaurants changed?

(Maybe your parents or grandparents could help you with this).

You can present your project in any way that you like. Here are some ideas:

- A PowerPoint presentation
- A poster to say why people should come to your local area
- Write your information in your home learning book
- Make a booklet

We hope you enjoy this exciting project, it might be something you'd like to share with your friends and teacher on the next Zoom meeting after half term.
