

Design and make a hand puppet to help tell a nursery rhyme or story.

You do not need to print out any of the resources you can make a template by using your hand. You can make the puppet out of old material like old clothes. Be careful when sewing as needles are sharp. You may want to get an adult to help you thread the needle.

First of all think of what character you want to make, either a story or a nursery rhyme.

Then design your character on a piece of paper or the sheet and include where you are going to sew and any design patterns you are going to put on like eyes.

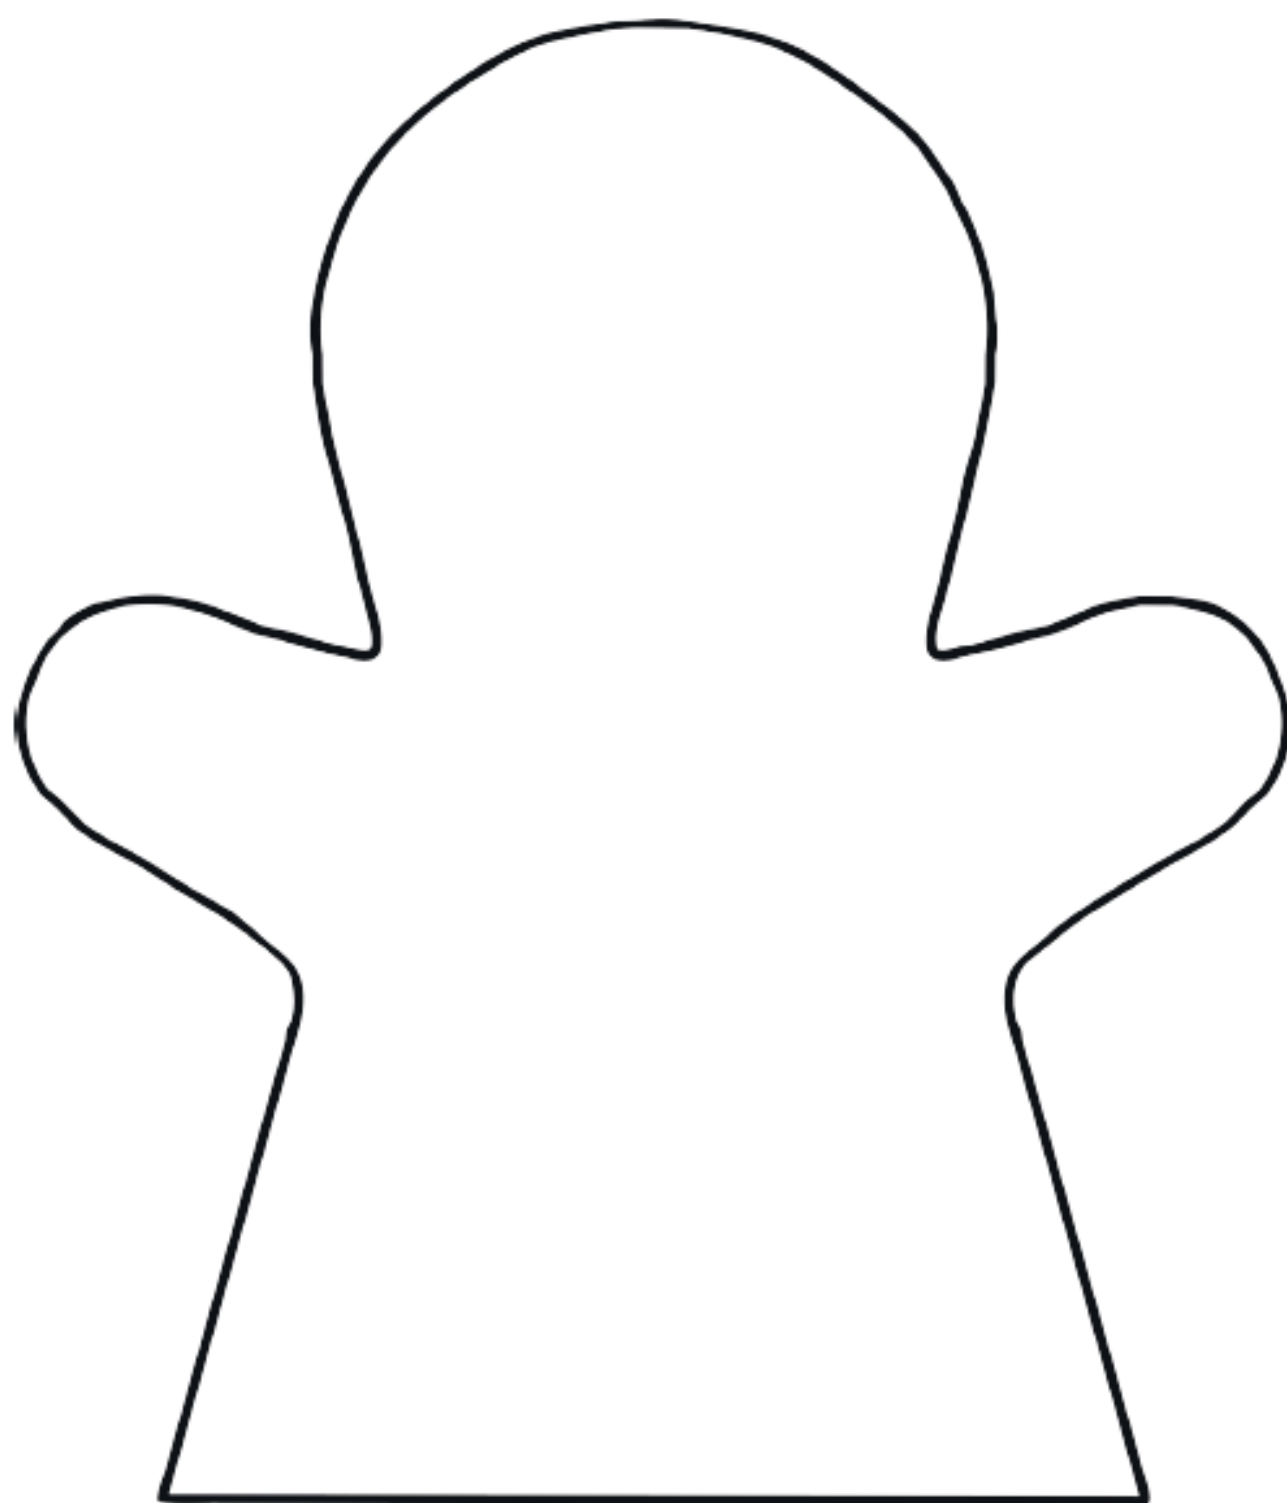

Then with watch the video about how to do a running stitch. You may want to practice this before you start making your hand puppet.

<https://www.youtube.com/watch?v=W4nhj8kMpAI>

Finally you can start making your hand puppet. You can use any material. Old clothes work really well for this and it is recycling. You may need to get help threading

Use the below template to get the right shape.

Please send in pictures of your completed hand puppets, we would really like to see them, enjoy!

WALT: To design a textiles product

WILF: All will: Verbally discuss their design ideas

Most will: be able to draw a simple drawing of their design

Some will: be able to label their design with materials and other decoration
