

Hello children,

My name is Rainbow and I am a chameleon. I live in a tall tree in a jungle. All around me, lots of tall trees and green plants are growing and there are lots of birds and animals living here too. However, I have a bit of a problem and I have heard that you are all very kind and helpful so I hope you can help me!

Chameleons are amazing because we can change colour to match the things around us. However, I'm usually green because so many of the plants and leaves around me are green. I'm getting rather bored of being green and I would like to change to some other colours.

Could you show me what other colours I could turn? Maybe I could be all different colours, like my name – Rainbow! You could send me some paintings or drawings to show me all the different colours I could be.

Thank you for your help,

Rainbow the Chameleon
