*Hidden numbers:*

*72, 81, 82, 83, 92*

*Alex is right. 79 would be on the part of the hundred square that was ripped off. I know this because, on the 70s line of the hundred square, the largest number left is 74. 79 comes after 74, so it must have been ripped of.*

Children can list any three numbers that would appear on the torn-off section.
