Dear Andrew,

I am having a great time staying at my granny's house for a few days. I planted some seeds last time I was here and I can't believe how much the plants grew! I also went fishing in the pond and found a newt.

Granny needed help to put up a shelf, so I held all the screws. Then, we played cricket and I threw the ball really far! I knew I could do it!

For dinner, Granny made a yummy vegetable stew. After dinner, we had a cake with a candle on top and I blew it out.

It was a busy day and the time just flew by. I look forward to seeing you soon.

Lots of love,  
Stewart x

## Go Jettters Continent of Africa

A continent is an area of land. There are seven continents and one of them is Africa. Africa is the second biggest continent and has more than 50 countries. It is famous for its animals like lions and elephants.

A landmark is something that stands out in an area. It could be a bridge, a lake or river, a mountain or something else. Here are some landmarks in Africa.

The Pyramids of Giza are in a country called Egypt. They were built a very long time ago for the kings of Egypt. The pyramids were made by lots of people moving stone blocks to the right place. **People from all around the world come to see the pyramids.**

Table Mountain is in South Africa. The top of it is flat like a table. Clouds often cover the top of the mountain. **Lots of special plants grow on Table Mountain.**
