

Measuring Length

Can you find 5 objects (e.g. toy cars) and order them according to size?

Tell someone at home how you ordered your 5 objects. Explain how you know you have put them in the correct order.

Find something that weighs the same as 3 apples. Now find something heavier and something lighter and put them in order of weight.

Find 3 different containers. Which one will hold the most water? Which one will hold the least amount of water? Can you explain to someone at home how you know and prove it?
