

AMAZING STONE AGE FACTS

WRITTEN AND
ILLUSTRATED BY ELLA-
MAE WHITE

The Stone Age started around 2.6 million years ago. When the Stone Age began a long long time ago. The Stone Age is a big chunk of time the Stone Age was split into three bits of time the Palaeolithic, Mesolithic and Neolithic. This text will tell you about what they eat, where they lived and what tools they made.

1. WHAT FOOD DID THEY EAT.

In the Palaeolithic, they hunted mammoths. They caught a mammoth by screaming at it into a swamp.

2. where did they live

The people were moving around not so much and they built wigwams shaped shelters in groups. The camps were moved in different seasons. The wigwams were built out of wooden poles and covered in animal skin and bark. The Neolithic was after the Mesolithic until about 2000 bc. In the Palaeolithic they lived in caves. Also, they built tents and fires at the front of their caves. Also, they built tents and they were made from animal skin. They moved around to catch their food and there might be a big bad bear inside of their caves. Next, they lived in tents.

3. What jobs did they do

They made fires and made tools such as flint spears and axes
