What Jobs Did They Do

In the old Stone Age they prepared the meats and smoked fish. They made fire strikin flint stones together. In the New Stone Age they bolt houses from mud and teef, wattle,and animal skin.

What did they eat?

All Stone Age men hunted wooly mammoths, sabre tooth cats and wild boar. Also they hunted fish. Most Stone Age people ate juicy berries and nuts. In the Stone Age they farmed crops. Many had sheep, pigs and cows. They had farms so they didn't move.
