Where did Stone Age people build their houses? page 6

The Stone Age began around 2.5 million years ago. It started in a continent called Europe and eventually spread to Britain. We called the Stone Age people **Hunter-gatherers**.

# What tools did Stone Age people make ?

Stone Age people made sharp spears and dangerous bows and Arrows to kill woolly mammoth and other animals.

# What did Stone Age people eat ?

In the Stone Age people had to gather nuts and berries also, they had to hunt to get meat. They had to hunt **woolly mammoth**, **sabre tooth tiger** and **woolly rhino**.

# Where did the Stone Age people build there houses?

Stone Age people build their houses next to a dangerous, scary, gloomy, dark forest also they lived in damp caves. They made houses out of animal skin and poles made of wood to hold up the houses.
