

# What was life in the stone age

The Stone Age began 2.5 million years ago also they made tools to kill and they lived

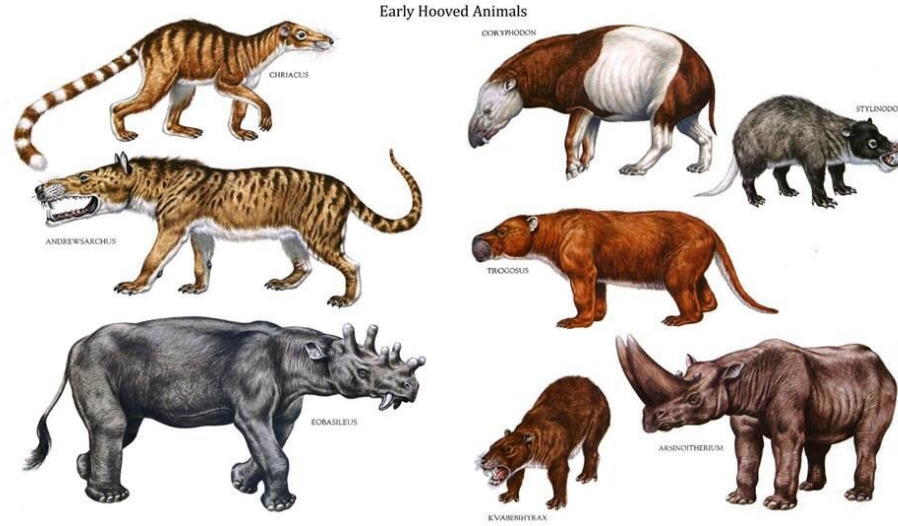

In caves so they can eat and have shelter they kill is sheep's pigs cows mammoths saner tooth tigers and anything they can find.

# What did Stone Age people eat

What did Stone  
Age people drink

In the middle of the camp Stone Age people lit a  
flickering hot fire to keep them warm  
They would collect wood in the massive woods aka  
forests to get it in the woods they  
Would chop down the trees to get more wood .
