

WILDEY STONE AGE

Illustrated and written by amie

Years ago dusty Stone Age started around 2.6 million years ago it is a time. That existed before history was recorded so archaeologists have used ancient how people lived.

*This text will tell you about,
What they ate?*

What jobs they did?

And where they lived?

Contents page

1. What they ate?

2. where they lived?

3. what jobs they did? And

What they ate?

Stone Age people had different ways of catching fish to eat. They used fishing spears called harpoons. The harpoons points were carved from the wood.

Jobs they did?

Men skinned a deer

they cut the meat.

When you cut the meat you need to be careful.

Women

didn't do much but they

Picked nuts and berries

And knitting and sewing

Where did they live

In the Paleolithic, they lived in caves. It could be dangerous because cave bears might live there. They put fire at the front of the cave to stop animals coming inside. In the Mesolithic, they made tents out of animal fur and sticks. They still had to move to get yummy food. In the Neolithic, they built farms with sheep and cows. This meant that they didn't have to move because they had food on the farm.
