Method:

numbered
points

	<p>1. First, empty the margarine tub and make sure it is full cleaned out.</p>
	<p>2. Next, decorate the tub by sticking on pieces of brightly coloured paper until the tub is covered.</p>
	<p>3. Then wait for it to dry.</p>
	<p>4. When it is dry, cautiously use a hole punch to put four holes in the top of the margarine tub so that you have two holes facing each other.</p>
	<p>5. After that, thread some wool through each of the holes and tie the two ends together.</p>
	<p>6. Finally, fill your bird feeder with bird food.</p>
	<p>7. Once you've finished, carefully hang the bird feeder outside.</p>

How to Wash Your Elephant

Has your elephant rolled in mud?

Elephants need to be kept clean or they can often become unhealthy. Use this handy set of instructions to ensure you keep your pet squeaky clean.

Equipment	
an extra long hosepipe (at least 10 metres)	a pair of elephant nail clippers
a set of step ladders	a sheet of sand paper
a large sweeping brush with stiff bristles	a feather duster
a bottle of elephant shampoo	

Method

1. Firstly, prepare your elephant for their bathing session in an area with plenty of space. Make sure that your animal is calm, well-fed and content. It may help to tickle their tummies to relax them if they are nervous about getting wet.
2. Next, prop up the step ladders beside your pet otherwise it is impossible to reach the top of their body. Climb the ladders carefully as you carry the hosepipe. Use lukewarm water to completely soak your elephant's skin.
3. After that, squeeze a whole bottle of elephant shampoo onto the animal's back. Use the sweeping brush to reach up and scrub every part of their dirty skin. Start at their back and work downwards to their feet.
4. Afterwards, rinse them off until all of the soap suds are gone. Be very careful not to let any of the shampoo drip into your pet's eyes as the pain could cause them to suddenly charge at you.
5. Now, you need to make your elephant lie down. A tasty bun may be helpful to convince them to go down to the ground. Use the sand paper to file the dead skin from the bottom of their feet and the nail clippers to trim their toenails. As a result, you should watch out for sharp bits of flying elephant toenail!
6. Finally, you need to gently clean your elephant's nostrils and ears using the feather duster. This can be very dangerous. Move quickly away from your elephant's trunk if they begin to shake or start to breathe more heavily. You do not want to be in the firing line of a powerful elephant sneeze.

Enjoy your spotlessly clean mammal but keep a close eye on them near any muddy puddles!

Write up time

Use the examples of instructions to help you think about how to lay it out. The order you need things in is:

- Title
- Introduction
- Equipment or what you will need
- Method
- Pictures - how many do you want? It's up to you!
- Conclusion

Take your time, think about spelling and grammar and read it back to check it make sense.

Upload your finished set of instructions onto Teams so your teacher can see how you've got in.

Good luck!
