

1.

Grouping

Circle and write a division equation for each picture.

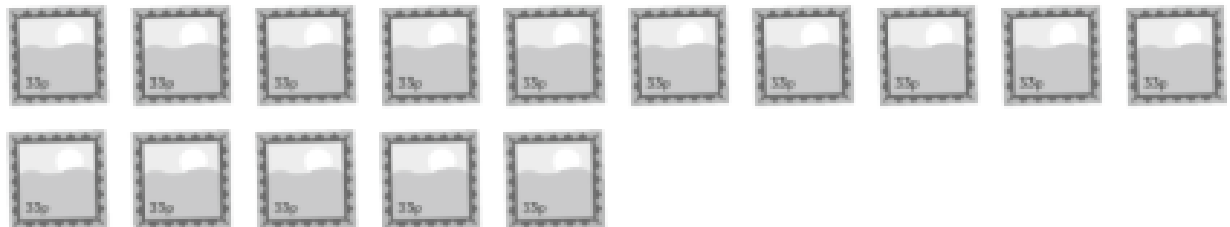

(a) Circle to show groups of 2.

$$\square \div \square = \square$$

There are groups of 2.

(b) Circle to show groups of 5.

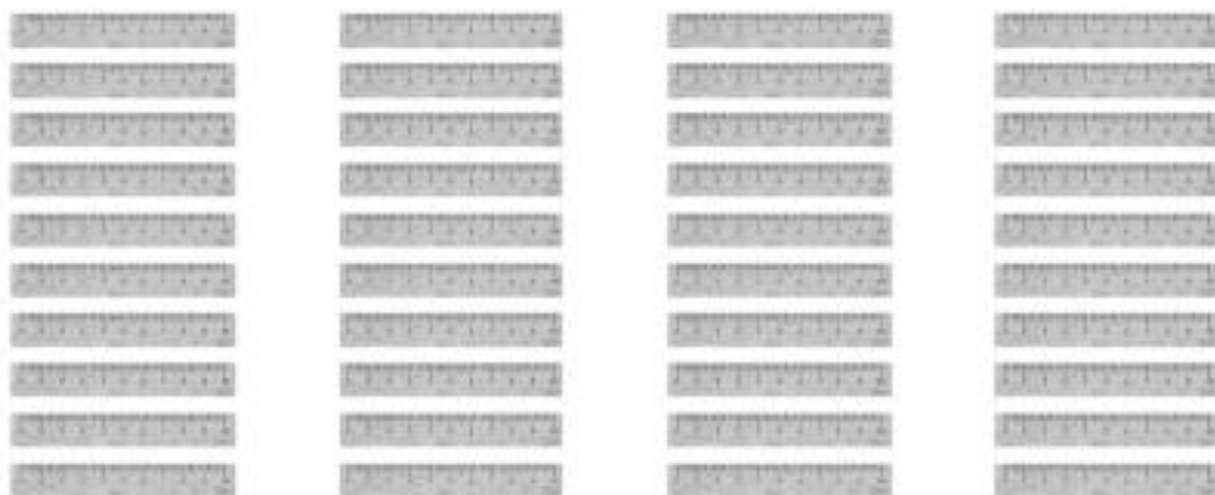

$$\square \div \square = \square$$

There are groups of 5.

2.

Circle to group in fives.

$$\square \div \square = \square$$

There are groups of 5.

Circle to group in tens.

$$\square \div \square = \square$$

There are groups of 10.

3. | Ruby has 10 fish.
She puts them equally into 5 bowls.

$$\square \div \square = \square$$

There are \square fish in each bowl.

$$\square \times 5 = 10$$

- | Write the missing numbers.

- (a) Put 16 apples equally in 2 baskets.

$$\square \div \square = \square$$

$$2 \times \square = \square$$

- (b) Put 15 oranges equally on 5 plates.

$$\square \div \square = \square$$

$$5 \times \square = \square$$

4.

Sharing

Circle and write a division equation for each picture.

(a) Circle to show 2 equal groups.

$$\square \div \square = \square$$

There are snails in each group.

(b) Circle to show 5 equal groups.

$$\square \div \square = \square$$

There are seashells in each group.

Circle to show 5 equal groups.

5.

$$\square \div \square = \square$$

There are \square rings in each group.

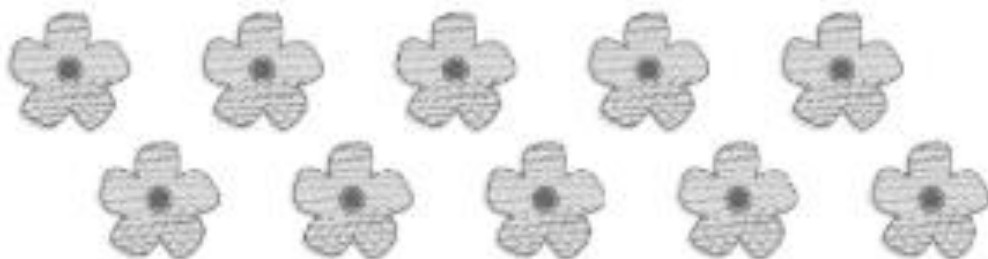

Circle to show 10 equal groups.

$$\square \div \square = \square$$

Write the missing numbers.

- (a) Amira has 10 stickers.
She gives them to 2 of her friends.
Each friend gets an equal number of stickers.

$$\square \div \square = \square$$

Each friend gets stickers.

6.

- (b) Sam has 18 coins.
He wants to put 2 coins in each box.

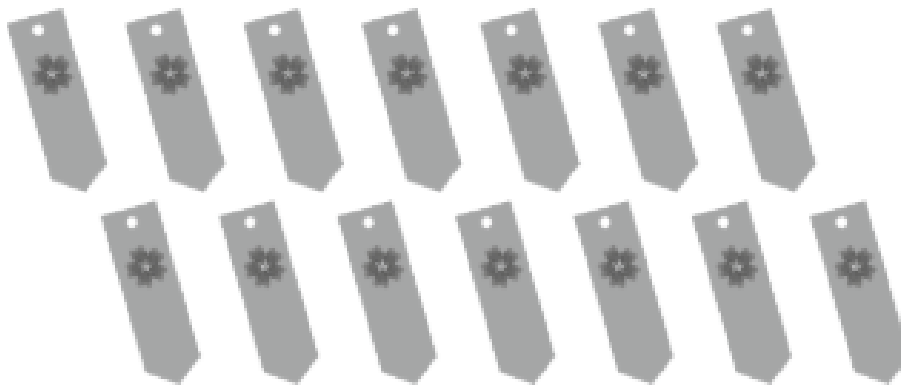

$$\square \div \square = \square$$

Sam needs boxes.

7.

- (c) Lulu has 14 bookmarks.
She wants to put 2 bookmarks in each book.

$$\square \div \square = \square$$

Lulu has books.

- (d) There are 8 pupils.
Their teacher wants to group them in pairs.

$$\square \div \square = \square$$

There are pairs of pupils.

Match.
