

#### Aim

• I can identify uses of different everyday materials.

#### Success Criteria

- I can identify different everyday materials.
- I can suggest materials that familiar objects are made from.
- I can explain what 3 different materials can be used for.

### What Do We Already Know?

Think back to your Science learning in Year 1. See if you can answer some of these questions with a partner:

How many everyday materials can you name and what were the materials used for?

Can you remember anything about them?

- What did they look like?
- What did they feel like?
- How did they behave?

Can you remember doing any investigations?

What did you find out and what did you learn?

### Think Again...

Look at the materials in these photos. What might they be used for?

Have a look around the classroom. Can you see any familiar objects which are made from these materials?

## Identifying Uses of Everyday Materials
