

# Maths Mastery Home Learning Challenge

## Adult Guidance

### What Are We Learning?

We are learning to count up to ten objects and beginning to count beyond ten.

### How to Set up the Challenge

- Choose a number of soft toys. This could be a number to ten, or a number beyond ten.
- Put the toys in a line.

### How to Get Your Child Thinking

- How many toys are lining up for playtime?
- How can you count them?
- When it is your turn to count the toys, make a mistake with your counting. You could count one toy more than once or miss a toy. Say, "Did I count all the toys carefully?"

## Lining up for Playtime

- Can you count how many toys are lining up for playtime?
- Can you make sure you don't miss any toys out?
- Can you line up some toys for your grown-up to count? How many will you put in the line?
