

Jigsaw Garden Design

By the end of today you need to..

- Have drawn your final design on either an A4/A3 piece of paper
- Coloured it all in
- Labelled your garden
- Submitted your design to Teams

Some things you might want to think about when designing:

- How could you use some of the free items on the Price List to make your garden even better? Think about how you could include some tyres as part of a play area or even to use as some seats!
- Think about the type of terrain you want to use on the floor. If you are designing your garden for a wheelchair user, which surface would be the easiest for wheels to glide along?
- You are allowed to include some items that aren't on the Price List. Just don't forget to Google how much they cost and factor this in to your budget.
- Don't forget who you are designing your garden for. Think about what they would find helpful and think about things that could be dangerous or unhelpful.
