

# Save The Rhinos NOW

Javan Rhinos are one of the most beautiful mammals on the planet.

But they are endangered and close to becoming extinct... We must act now!

Javan Rhinos are close to going **extinct**. It is so **unfair**. There are **only 60** of these endangered animals left. If we do not act now, they will all be **gone**! But you can help. Without your donations, poachers will keep taking these amazing creatures. It is **vital** that we stop this now or they will **unfortunately** all be gone forever! **Please help.**
