

Understand what a light source is and understand we need them to see.

Go around your house and list things that you can see are light sources and things that aren't light sources. You can use the PowerPoint to help you if you are stuck.

Light source	Not a light source

A light _____ is something that makes light. Some examples of light sources are _____.

Some objects seem to make light but are not really light sources. The moon is not a light source because it reflects _____.

Dark is the _____ of light. It is dark at night time because light from the sun is not visible. When it is dark, there is no _____ to illuminate objects, so we _____ see them. We need light to be able to see things.

Absence	can't	light	source	light
