

Describing Three-Dimensional Shapes

1 Name the solid that is formed by folding the flat shapes below.

(a) 

(b) 

(c) 

(d) 

2 Describe the following solids by completing the table.

	name	number of faces	shapes of faces	example
				
				
				
				

Use the clues to label the shape with the correct letter.

- Shape A has an odd number of edges.
- Shape B has the most edges.
- Shape C has the same number of edges as a cube has faces.
- The edges of shape D are all the same length.

Write the name of two 3D shapes that have the same number of edges.

_____ and _____

Match each shape to the correct label.

< 5 vertices

$= 5$ vertices

> 5 vertices
